

Equator

BONNET

COMBINATION OVENS

EQUATOR the new generation of combination ovens

BONNET

Since 2007, with the ITW group at the head of 840 facilities in 57 countries ; Bonnet has benefitted from its research and development capacity and its industrial know how

SIMPLICITY - RELIABILITY COOKING QUALITY

For almost 100 years **BONNET** has been known for its culinary expertise in Grande Cuisine ; both in France and Internationally

Such expertise in cooking allows us to introduce performance innovations, to respond to our clients' requirements and anticipate their needs

BONNET has almost 30 years experience in the field of combination ovens and already has 3 generations of **EQUATOR** ovens constructed in France

9 MODELS AVAILABLE TO RESPOND TO ALL YOUR NEEDS

EQUATOR an injection oven simple and reliable

BONNET

Simple to use :
an electro mechanical
control panel incorporating all
the essential functions

SIMPLICITY

Ready to use **FAST**

Easier to read **ELECTROMECHANICAL CONTROL PANEL**

MANUAL INPUT SELECTION

COOKING SETTINGS VISIBLE AT A GLANCE

Cooking mode, internal temperature, remaining time, core temperature, vent open/closed or ventilation speed
Production of steam by injection, a well proven technology

RELIABILITY

Production of **STEAM BY INJECTION**,
a well proven technology

PROTECTING ACCESSORIES

Removable core probe (optional) means it is protected from damage

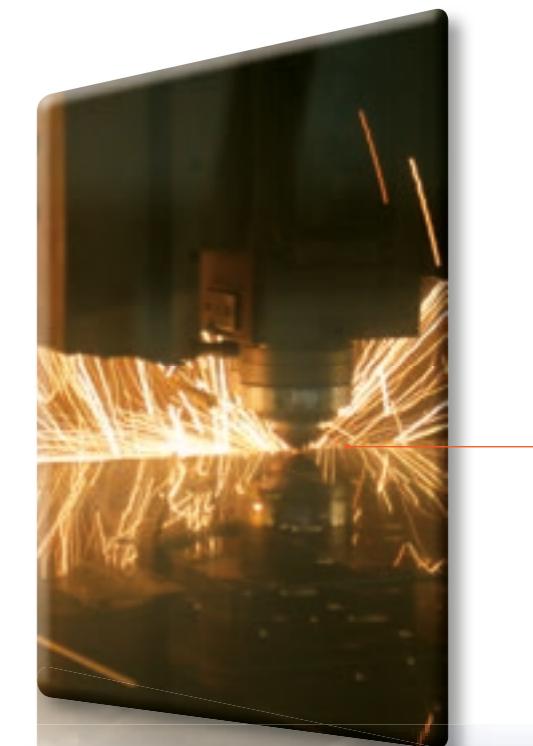

VENTILATED TECHNICAL COMPARTMENT
Regulated temperature

An oven designed from the very start to reduce wear and improve its long term strength and reliability

RESISTANCE to mechanical tests : 211,000 door openings corresponding to 13 years use without a breakage

Automatically displays the **NUMBER OF HOURS UNTIL A SERVICE IS DUE** when switched on

Precision assembly and long term reliability ensured by **LASER CUTTING AND WELDING**

EQUATOR cooking quality

BONNET

An injection oven equipped with CoreControl® and AirControl® technologies to guarantee the expected results

THE EXCLUSIVE AIRCONTROL® FUNCTION GUARANTEES CONSISTENT AND EVEN BROWNING OF YOUR DISHES

6 COOKING MODES ARE AVAILABLE

- Low temperature steam (30°C to 97°C)
- Saturated steam (98°C)
- High temperature steam (99°C to 105°C)
- Convection (0°C to 250°C)
- Combination (30°C to 250°C)
- Regeneration

1 HOLDING TEMPERATURE MODE

Oven semi static to avoid the product drying out

1 COOLING MODE

Drop from 220°C to 80°C in less than 5 minutes with the door closed

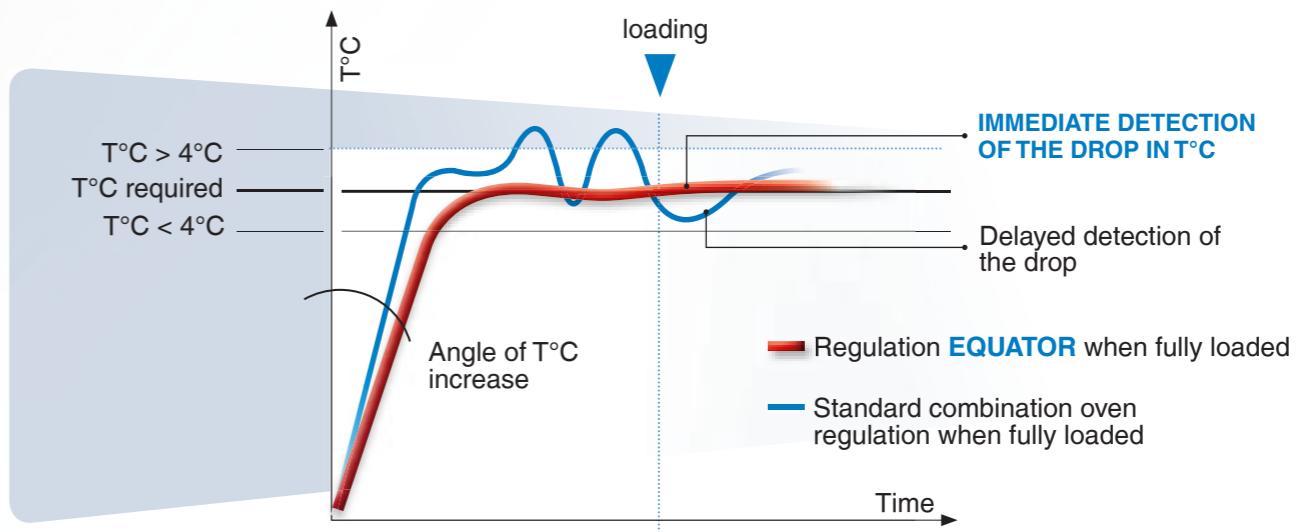

To ensure IDEAL BROWNING - a product that is crisp whilst remaining moist inside - the EQUATOR oven is fitted with AUTO-REVERSE FANS : the AIR DRY function with VARIABLE VENTILATION SPEED

UNIFORM & CONSISTENT

3 VENTILATION FANS ON 20 LEVEL OVENS

THE CORECONTROL® IS ONE OF THE EXCLUSIVE FEATURES OF THE EQUATOR OVEN THAT ALLOWS SUCH ACCURACY OF TEMPERATURE

TEMPERATURE PRECISION
Takes account of the load in the oven cavity and automatically adjusts the power to suit

ADAPTED AMBIENT HUMIDITY
Automatically adjusts the steam to suit the product

RAPID COOLING
Of the oven cavity to switch from a convection mode to a low temperature cooking mode - even during service

EQUATOR simple to maintain, ecological and economical

BONNET

Introduced into a global market that respects the environment, EQUATOR was designed to consume less water and energy for effective and reassuring cleaning

MAINTENANCE FACILITATED BY THE SYSTEM OF INJECTION

No boiler to descale!

FULLY AUTOMATIC CLEANING PROGRAMME

Oven cavity temperature setting and integral rinse

CLEANING PROGRAMMES :
Select the automatic cleaning programme of your choice

ECONOMICAL & ECOLOGICAL

ECO DESIGN

During construction, the laser welding eliminates the need to polish

A new form of insulation is used in line with the CE directive on fibres which is easier to work with

WATER

The new cleaning system **FULL CLEANING SYSTEM®** uses up to **50%** less water than a standard high efficiency oven

ELECTRICITY

The new technologies that have been developed make **EQUATOR** ovens up to **15 %** more economical than standard high efficiency ovens

RECYCLING

Recyclable materials used (metal, plastics, packaging wood, new lead free electronic circuit boards) comprise over **95%** of the total mass of these products

CARBON FOOTPRINT

With identical results and performances, the consumption of gas has reduced by between **5** and **9 %** depending on the model and the discharge of exhaust are **140** times less than the level allowed by European standards. Noise levels have also been cut **three** fold
